My Professional Profile as a QA Automation Student

Introduction

This written document presents my professional profile as a QA automation student at SENA. It describes who I am, what I study, my daily routine, a brief academic project, and my goals. I use clear language, basic academic style, and simple coherence devices.

Personal Profile

My name is Johan Sánchez Gaviria. I am twenty-six years old and I live in Bogotá, Colombia. I study Technology in Software Analysis and Development at SENA. I am curious and detail-oriented, and I enjoy learning about quality assurance and automation practices.

Daily Routine

From Monday to Friday, I work from 8:00 a.m. to 6:00 p.m., and I study from 6:00 p.m. to 10:00 p.m. First, I organize my activities; then, I read documentation and write small scripts. I usually create or review test cases, and I practice SQL and Java. Finally, I plan the next day.

A Recent Achievement

Last month, I completed a small front-end exercise and a database script for a training task. I documented the steps, applied accessibility basics, and validated the SQL using sample data. This activity improved my discipline and teamwork.

Academic Project: Alumipro

As part of my studies, I created a simple educational project called Alumipro. The project combines HTML, CSS, and JavaScript with a basic relational database in MySQL/MariaDB. The goal is to develop clear code, good practices, and evidence of quality.

Skills and Tools

I practice Java and JavaScript; I also use Git and GitHub for version control. In QA, I study BDD and Gherkin for requirements, and I learn how to automate tests for web and mobile. I also practice SQL for DDL and DML commands.

Future Goals

In the following months, I am going to improve my test automation portfolio with clean examples and clear documentation. I will participate in academic activities and I will collaborate with classmates to achieve better results.

Conclusion

In conclusion, this written document summarizes my academic profile and goals as a QA automation student. I study consistently, I practice every week, and I focus on quality and teamwork.
